Patrick Gass of Wellsburg, the first to publish an account of the Lewis and Clark Expedition and the last surviving participant

On September 9, 1803, Meriwether Lewis departed from Wheeling on the first leg of the Corps of Discovery's expedition to explore western lands purchased from France.

CSO: SS.8.13, SS.8.20

Investigate the Document: (Lewis and Clarke’s Journal to the Rocky Mountains; 917.8L6750)

1. Using the map, can you determine on which river Lewis and Clark’s expedition began?

2. The Lewis and Clark camp near the boundaries of Ohio-Virginia-Pennsylvania was located a short distance from this city, well-known for the sieges during the American Revolution a few decades prior.

Think Critically: Without the knowledge and maps provided by the Lewis and Clark expedition, would western expansion have been possible in the 1800s?
LEWIS AND CLARKE'S JOURNAL TO THE ROCKY MOUNTAINS

In the years 1804, 5, 6;

AS RELATED BY

PATRICK GASS,

ONE OF THE OFFICERS IN THE EXPEDITION.

New Edition with Numerous Engravings.

DAYTON,

1847.
to go with me as far as Wheeling—the articles were not as much
injured as I had supposed.—about two miles above my camp
passed the line, which divides the States of Virginia and Pen-
sylvania on the east side of the river and on the West that of
Pennsylvania from the State of Ohio; this line is made vis[ible]
from the timber having been felled about sixty feet in width, the
young timber has spring up but has not yet attained the hight
of the other that it can with ease be traced with the eye a con-
siderable distance—it passed the Ohio River at the mouth of
mill Creek. The water is so low and clear that we see a great
number of Fish of different kinds, the Sturgeon, Bass, Cat fish,
pike, &c. we fixed some spears after the Indian method but have
had too much to attend to of more importance than gigging fish. ¹
September 5th

Again foggy, loaded both my canoes and waited till the fog
disappeared set out at 8 O’C. had some difficulty in passing
several riffles today but surmounted it without having recorse to
horses or oxen—rained at six this evening and continued with
some intervals through the night to rain pretty heard; took up at
the head of Brown’s Island;² it grew very dark and my canoes
which had on board the most valuable part of my stores had not
come up, ordered the trumpet to be Sound[ed] and they answered.
—they came up in a few minutes after; the stores in the canoes
being well secured with oil cloth I concluded to let them remain
on board and directed that the water which they maid should be
bailed out of them occasionally through the night, which was done
—they still leaked considerably notwithstanding the repairs which
I had made on them; we came 16 miles this day.
September 6th 1803.

The fog was as thick as usual this morning detained us untill
¾ past 7. O’C. when we set out—observed the Thermometer in
the air to stand at 71° Water 73°—the fog continued even with
[this] small differences between the temperature of the air and
water struck on a riffle which we got over with some difficulty
and in the distance of two miles and a half passed 4 others three of
which we were obliged to drag over with horses; the man charged
me the exorbitant price of two dollars for his trouble.—got on

¹ The night’s camp was at, or in the vicinity of, East Liverpool, Ohio, now
the center of important pottery and tile manufactures.
² Still called Brown’s Island, its head, and the night’s camp, six miles above
Steubenville, Ohio. For an interesting sketch of “Squire” Brown, from whom
it takes its name, see Early Western Travels, IV, 105–6.
