Describe the present and original (if known) physical appearance

"Mountain Home", built c. 1833 for Robert Dickson, member of a family prominent in the Greenbrier Valley for four generations, stands on a promontory six miles east of Lewisburg above U.S. Route 60, facing Howard Creek and the southwest.

The architectural character of the house is noteworthy. Late Federal and Roman Revival elements of both the exterior and interior align to form a design of distinction. Prominent among such features are the two-story, single-bay portico with a lunette-adorned pediment, broad windows headed with blind brick arches, and superbly hand-carved interior woodwork that may represent the finest extant example of the work of master carver Conrad Burgess in the Greenbrier Valley.

"Mountain Home" is a large two-story brick house with a kitchen ell. Despite the building's deteriorating condition, the survival of many original details provides a rich source of information on local upper-class housebuilding and decorative technique of the early nineteenth century in West Virginia.

Paired Roman Doric columns of brick construction with plastered surfaces carry the two-tier, single-bay entrance portico. The entryway beneath is surmounted by a delicate semi-elliptical fanlight and is flanked by sidelights with heart and oval-shaped glazing members. Fluted colonnettes (mullions) separating the sidelights from the broad colonial door carry a carved, dentiled cornice.

Classical detail of the exterior is repeated in the large square rooms with 12-foot ceilings and handsomely carved mantels, paneled wainscoting, and ribbed door and window casing. Forty-inch-wide doors retain their box locks. Fine woodwork is evident in a 3-flight stair with a delicately molded continuous rail. Paneled wainscoting adds additional notes of formality to the open-string stair with carved bracket-work decorating the stringer.

"Mountain Home", though in a state of decay, was recently purchased by owners who recognize the historical quality of the property, and who propose in work now beginning to stabilize the house.

Specific dates	c. 1833	Builder/Architect	John W. Dunn, master builder Conrad Burgess, wood-carver
-----------------------	---------	--------------------------	---

Statement of Significance (in one paragraph)

"Mountain Home", originally called "Locust Hill", is significant because it is one of the best preserved houses of Greenbrier Valley master builder John W. Dunn, and because it retains highly significant and well preserved mantels and other woodwork executed by the master wood-carver Conrad Burgess. Dunn and Burgess are known to have pooled talents on several house building projects; but none, perhaps, exhibit qualities of this association more dramatically than that of the commission by Robert Dickson, a member of a distinguished local family.

Grants of land were obtained by Joseph Dickson in the Howards Creek section of the verdant Greenbrier Valley as early as 1785 (according to Ruth Woods Dayton in her book, Lewisburg Landmarks, p. 59). Mountain Home was built for Robert Dickson, son of Joseph, about 1833 from bricks fired on the premises.

For well over a century the Dickson family resided on the land and became widely known for the breeding of quality horses. Their horses won numerous awards in adjacent counties and at the State Fair in Lewisburg. The Greenbrier Hotel at White Sulphur Springs, according to Dayton, was furnished riding horses for its guests by the Dicksons for many years. Dickson horses were also sought after by patrons in neighboring states.

In recent years intrusive developments in the form of several gas stations have encumbered the landscape along U.S. Route 60 in the vicinity of Mountain Home. Nevertheless architectural integrity of the old landmark has not been compromised.

The significant qualities of the building's late Federal and Roman Revival (which suggest Jeffersonian appeal) design are vernacular and appear in several other residences of the Greenbrier Valley. Single-bay, two-story porticos with fan-lighted tympana may be seen in the region; in some instances these are carried by wood posts and are of simple design. It is the combination of more expensive materials and detail, and the presence of outstanding interior work, that distinguishes the Dickson House.

The late Federal style wood mantel of the parlor represents the high quality of carving produced by Conrad Burgess. A deep shelf carried by enriched consoles is supported by fluted colonnettes. The frieze of the mantel is centered with a tablet incised with an Adam-style oval fan. Flanking the center tablet are recessed empty panels. A running course of incised units outlining the fire surround is duplicated in the mantel shelf cornice, and in the cornice of the room's wainscoting.
