National Register of Historic Places
Registration Form

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in *How to Complete the National Register of Historic Places Registration Form* (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If an item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

1. Name of Property

historic name Elm Grove

other names/site number Long's Landing

2. Location

street & number 2283 U.S. 35 North not for publication

city or town Southside vicinity

state West Virginia code WV county Mason code 053 zip code 25187

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act, as amended, I hereby certify that this nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property meets does not meet the National Register criteria. I recommend that this property be considered significant nationally statewide locally. (See continuation sheet for additional comments.)

8. Statement of Significance

Applicable National Register Criteria
(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing.)

- A Property is associated with events that have made a significant contribution to the broad patterns of our history.
- B Property is associated with the lives of persons significant in our past.
- C Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations
(Mark "x" in all the boxes that apply.)

Property is:

- A owned by a religious institution or used for religious purposes.
- B removed from its original location.
- C a birthplace or grave.
- D a cemetery.
- E a reconstructed building, object, or structure.
- F a commemorative property.
- G less than 50 years of age or achieved significance within the past 50 years.

Areas of Significance
(Enter categories from instructions)

Section number 7 Page 1

Elm Grove Mason County, WV

NARRATIVE DESCRIPTION

Gracefully situated along the Kanawha River in Southside, West Virginia off Route 35 on 17/9, "Elm Grove" is a farm complex with development ranging from 1803 through 1923. The complex is located on rich bottom land which was owned and developed by the Long family until 1947. "Elm Grove" was once a prosperous plantation consisting of more than 2000 acres. The present complex is 17.09 flat acres of fields and a large tree shaded lawn with the following buildings and structure as noted on the Mortgage Plat, Arbuckle District, Mason County, Deed Book 290.

Number 1 The contributing manor house is a High Victorian Italianate style brick farmhouse built in 1884. The asymmetrical style has plain, yet striking rectangular windows. There are two round attic portholes. The three porches are of single-story height and are supported by square posts with beveled corners and cast iron decorative railing. Large eave brackets dominate the cornice line. The front door and one side porch door are paired, the other three entrances are single. The roof shows the common shallow roofline pitch. The integrity is exceptional.

The interior and exterior walls are about one foot thick and made of bricks which were fired on the plantation. Lumber for floors was cut from the site. Marble mantels for four of the nine fireplaces came from Italy. Doors, windows for the thirteen rooms and center and rear hallways, and the woodwork for the ornate stairways and twelve foot ceilings, came from Cincinnati.

Number 2 The two story contributing log house was built in 1803 and was the first house built by the Long family. The logs are hand hewn poplar. The original fireplace stones are still on the site, located near the barn. An unusual feature is an extended log on the left front which was used to hang game. The windows feature iron bars. The logs are standing but in disrepair. The roof has recently collapsed.

NARRATIVE DESCRIPTION (continued)

Number 3 The contributing bungalow was ordered from Sears and was a classic and fashionable house of the 1920's. The exact construction date is unknown but it was completed prior to 1923. The one and a half-story dwelling has horizontal lines, wide eaves, and a low-pitched roof with low, wide dormers. The front porch has elephantine columns and is an extension of the living space. The house has stained green shingles. There is a bay window in the dining room.

Number 4 The late 19th century barn is a large wooden structure constructed with wooden pegs. There is a large loft and behind the barn is a non-contributing machinery shed. Of note, between the barn and shed is a large cistern lined with handmade bricks.

Number 5 A contributing structure is a large sandstone fireplace shaped kiln located behind the manor that was used to fire bricks for the manor house. The kiln is standing but shows considerable evidence of deterioration due to time and weather damage.

Numbers 6, 7, 8 Three late 19th century or early 20th century contributing buildings are located along the drive behind the manor. These storage buildings are made of wood and two have lofts. Some of the original handmade hinges remain.

Number 9 There is an unevaluated site in front of the manor house which was the site of the first brick house built circa 1830. The noncontributing site's hand-dug well, which was lined with fieldstone, has been filled in except for the two feet still exposed.

"Elm Grove" is a well preserved Kanawha Valley farm complex that has preserved a number of buildings and structures spanning 120 years of Kanawha Valley history.

United States Department of the Interior
National Park ServiceNational Register of Historic Places
Continuation SheetSection number 8 Page 2 Elm Grove Mason County, WVNARRATIVE STATEMENT OF SIGNIFICANCE

"Elm Grove" features a wide range of architecturally significant elements from an 1803 log house to a mail order 1920s bungalow. Outstanding among these resources is an Italianate house, a landmark in the Kanawha Valley. These related buildings and structures form an unusually well-preserved complex dating from 1803 to 1923.

The Long family arrived in Williamsburg, Virginia around 1702. They entered the Shenandoah Valley in the early 1700's and lived around Fort Long near Massanutten. Phillip Long, Jr., a veteran of the Revolutionary War, bought the 1100 acres bounded by the river that became Elm Grove plantation, from heirs of George Washington and deeded it to his son Adam in the early 1800's. Adam arrived in 1803 by raft with his family and tied up to the Sycamore tree marked by George Washington when he camped and hunted fifteen miles from the mouth of the Kanawha River before the Revolution. This huge Sycamore, of which a hollow portion of the trunk still remains, served for years as a marker for Long's Landing, the river dock where goods were received and crops shipped. While living in a temporary sod hut for several months, the Long's built a log home in 1803 which still stands today. This log structure, referred to as "The Fort", was the family residence until the 1830's.

In the 1830's, George Long, oldest son of Adam and heir to "Elm Grove" built a brick home that was the plantation manor house until the flood of 1883. Tradition has it that James Long, heir of George was atop the mountain behind the plantation at the height of the 1883 flood and decided to build a new home on the knoll that was above the water a couple hundred feet behind the old one which was two feet deep in water. The new and present "Elm Grove" manor was built in 1884.

James Washington Long was born February 15, 1833. He married Catherine Hannan on November 26, 1863 and had eight children. James followed the occupation of farming and met with the success that followed a life of industry and good judgement. At the time the manor house was built, Mr. Long owned 1,435 acres in the Arbuckle district, 625 being bottom and 810 upland. He was considered to be a "clever neighbor and a popular citizen."

Section number 8 Page 3

"Elm Grove", Southside, Mason County, W.V.

Under Criterion C, the complex of buildings and structures at Elm Grove farm present an exceptionally significant variety of architecture tracing the development of a settlement-period farm well into the 20th century. These resources range in age from the 1803 log house, to a 1923 Sears pre-cut bungalow.

Only a small number of log buildings survive in the lower Great Kanawha Valley from the last years of the 18th century and first years of the 19th century. Among these, the Long log house is the largest and least altered, although advancing deterioration has caused the collapse of the roof. (The other important log buildings in this section are the 1796 Mansion House, Point Pleasant, Mason County; and the pre-1830 Couch-Artrip House log dependency, Route 35, Southside, Mason County.) The impressive size and well-preserved half-dovetail notching system of the squared log members, is a significant survivor of regional settlement-period building arts.

The houses on the property, in contrast, represent quintessential examples of later local architectural styles fashionable in the post-frontier 19th century and early 20th century. The brick farmhouse is of the Italianate style; its bracketed eaves with sawn bargeboard-decorated gables and shallow roof profile represent features of the 1880s rare to the region. Other excellent features are the long porches with their finely detailed bracketed Italianate-style wood columns. Shadowing the Elm Grove mansion is a c. 1923 Sears pre-cut mail-order bungalow. Built by a later generation of farm dwellers, the house was shipped to the valley by rail in a ready-to-assemble kit which the builder unloaded and erected, a creation which excited in its day the same admiration the larger brick Italianate house must have in the earlier century. The low horizontal silhouette, projecting porch gable carried by tapering brick piers, and solid construction represented housebuilding which was typically American, popular, and economical.

The Long Farm buildings and structures are significant therefore because they embody distinctive characteristics of a type, period, and method of construction that are not found in such association in another known location in the Great Kanawha Valley.

Elm Grove, Southside, Mason County, W.V.

Verbal Boundary Description

The large farm complex occupies a level flood plain, called a "bottom," overlooking the Great Kanawha River. The boundaries of the nominated property are inclusive of the "Elm Grove" brick house, dependencies, outbuildings, and structures which stand within a 17-acre rectangle delineated by a red line on the attached sketch map adapted from the MORTGAGE PLAT, ARBUCLÉ DISTRICT, MASON COUNTY, WV, Deed Book 290, p.82, Mason County Courthouse, Pt. Pleasant, W.V.

Boundary Justification

The boundary encompasses all known historic resources which forms a 19th and 20th century agricultural complex, inclusive of grounds and settings which are tree-shaded or open field. This combination of a cluster and open grounds permitted the use of nearby associated spaces for domestic and farm activities, such as gardens, grazing, storage, and farm utility equipment repair and storage. The boundary also includes a historic vista -the river bank and river - that has been central to the character and survival of the farm since settlement days.
