Property Owners

Name of Owners: Multiple Owners

Notified by Legal Notice
The Chancery Hill neighborhood began developing around 1900 when the land holdings of Waitman T. Willey, Frank Demain, and William Guseman were divided into lots. Builders began developing the area as a suburb for Morgantown professionals. What developed is a blend of early twentieth century architectural styles that still retain their integrity in massing, materials, and architectural details. This eclectic blend of styles makes Chancery Hill a representative example of an early twentieth century neighborhood.

The boundaries of the Chancery Hill Historic District include an area bounded on the east by the back lot lines of the residences on Waitman Street and generally on the west by University Avenue. Oak Grove Cemetery and Ford Street and the back allies of South High Street are the western boundaries, and Barrickman Street serves as the southern boundary. The property lines of the Alexander Wade home, and the Waitman T. Willey home; as well as Simpson and Allison Streets, generally serve as the northern boundary.

**Oak Grove Cemetery:** Contributing site

Oak Grove Cemetery is situated on the southwest border of the district along Dorsey Avenue. Originally designed as a rural cemetery in the 1860s, Oak Grove's 8.5 acres served as a burial locale for the town of Morgantown until filled to capacity in the late 1920s. The grounds of the cemetery contain a variety of funeral monuments, representing the funerary art of the nineteenth and early twentieth centuries. A gate post marks each entrance and the cemetery is bordered by a fence.

Established by a board of trustees soon after its purchase in 1865 from Waitman T. Willey, Oak Grove Cemetery is so named for the expanse of oak trees on its western border. Looking the Monongahela River on the edge of town, Oak Grove was designed as Morgantown's only rural cemetery. Oak Grove contains mostly family plots which are reached by a series of curvilinear pathways. Only the older section is included in the boundaries; a modern addition is on the other side of the fence and has a separate entrance.

**Architecture:**

The architecture of the district includes many styles from the late nineteenth and early twentieth centuries. The majority of the houses are in excellent condition and have the original exterior facade material. The most prominent architectural styles represented are the American Foursquare, Colonial Revival, and Bungalow, all interspersed with Italianate, English Tudor, and one Prairie style house. One house of worship, the Tree of Life Synagogue, established in 1948, remains a testament to the ethnic diversity of the neighborhood, as well as the neighborhood's architectural diversity.

The majority of the noncontributing buildings represent significant architectural modifications or are of a later period of multiple use and residential building. A noncontributing fire station, is located on South High Street.

The following is a list buildings and a cemetery in the Chancery Hill Historic District, with a designation for contributing and noncontributing. They are listed alphabetically according to street.
ALLISON STREET
240-244 ALLISON STREET, residential duplex
date: c. 1985
description: 2 story, 4 bay, brick duplex, vinyl windows, gable asphalt roof.
1 noncontributing building

260 ALLISON STREET, residential
date: c. 1985
description: 1 story, brick and T-111, Ranch style, attached garage, gable asphalt roof.

The Chancery Hill Historic District is significant under Criteria A for Community Planning and Development; and Criteria C for Architecture. This area was subdivided from a 1840 farm and developed between the period of 1900 and 1949, across Deckers Creek from downtown Morgantown. The streets are lined with well preserved homes predominantly reflecting the late Victorian and early Colonial Revival styles.

The Chancery Hill neighborhood was once part of the Waitman T. Willey farm. On the northern boundary of this tract, just below Deckers Creek, Willey constructed his Greek Revival residence between 1839 and 1840, taking advantage of a commanding view of the Monongahela River. Waitman T. Willey was a member of the Virginia Constitutional Convention of 1850-51, the West Virginia Constitutional Convention, and the first United States Senator from the new state of West Virginia in 1863.

Subdivision

Located due south of the original plat of Morgantown, Chancery Hill was once the farm of U.S. Senator Waitman T. Willey. Willey purchased the farm from John Rogers in roughly 1839. The Willey farm included the entire area bounded by what is now University Avenue between Prairie Avenue to, and including Oak Grove Cemetery.

After the Civil War, local residents named the area of Willey’s farm Chancery Hill because it was the location of the residences of three distinguished barristers: Willey, Edward C. Bunker, and John James Brown. Edward C. Bunker was prosecuting attorney for Monongalia County from 1861 to 1863, and Major John James Brown was the nephew of William G. Brown, sponsor of the West Virginia statehood bill in the U.S. House of Representatives. Brown was also a delegate to the First Wheeling Convention of 1861 which framed the first constitution of West Virginia in 1863. He later became president of Morgantown’s Merchants National Bank.

Willey deeded a portion of his estate to his son-in-law, J. Marshall Hagans, a local attorney in 1860; Hagans sold this three-acre tract to Francis Demain in 1874. Directly southwest of this tract was the residence of Francis Demain built on land also originally owned by Willey. The Demain tract would later become the Demain Addition, as platted by Francis’ widow Catherine and his heirs, in the early 1910s. The William D. Guseman residence, also on a site formerly owned by Willey, was the only other house between the Demain property and Oak Grove Cemetery in the late nineteenth century. Guseman sold his ten acres to Samuel McGara in 1896, and it became the McGara Addition.

After Willey’s death in 1900, his heirs began to develop the area known as Chancery Hill. Beginning around the turn of the century, developers began selling parcels of the Willey Estate, by then partitioned off into three sections, and built houses in a wide variety of architectural styles. Laid out in a grid pattern, Chancery Hill originally included the area immediately south of Deckers Creek surrounding the Willey estate. The first streets were named Main, Wagner, White, Park, Waitman, and Allen. The latter was named after Guy Richard Champlain Allen, a Preston County lawyer then residing in Morgantown. The name has been changed to Simpson Street. Later streets were also named for lawyers. Barrickman Street honors Van A. Barrickman, another Morgantown lawyer. Wagner Road is named after William Wagner, the first clerk of the Morgantown Branch of Merchants National Bank and a prominent citizen. While White Street was named for West Virginia State Geologist and Morgantown resident, I.C. White. The street is now called Allison
Street. Waitman Street is named for Waitman T. Willey. As Morgantown expanded, the neighborhood also expanded south, eventually absorbing Oak Grove Cemetery and the additions between the two parcels.

Oak Grove Cemetery:
In 1865, Willey sold 8.5 acres near a stand of oak trees overlooking the Monongahela River, to the Oak Grove Cemetery Association. Among the incorporators of the cemetery, were John J. Brown, Edward C. Bunker, and Waitman T. Willey, the three notable barristers for whom the area was named. Oak Grove Cemetery was the sole burial local in Morgantown until the early 1920s. Willey also served as president and director of the Cemetery Association until 1895, retiring that year due to his advanced years.

The cemetery is laid out in a rural cemetery tradition, with family plots and curvilinear paths. It overlooks the Monongahela River. The gravestones are eclectic in style, but Victorian forms dominate the landscape. On the western portion of the cemetery, which was the first section platted, there is an eclectic mix of Victorian drapery, obelisks, urns, lambs, and crypts in granite, sandstone, and marble. Many of the family plots have a main gravestone with smaller markers where individual members are interred. A twenty-foot tall granite monument stands in the northwest corner of the cemetery. Originally erected to commemorate the fallen sons of Monongalia County in the Civil War, the monument has since become a memorial to those who served in all wars. The representative Union soldier is symbolically facing north. The two sets of entrance gates to the cemetery reflect different styles common to the Victorian period. The western gates are stone in a Romanesque Revival style, and the eastern gates are a Neoclassical Revival design in iron with finials.

Graves from the other local cemeteries were relocated to Oak Grove in the late nineteenth century giving the cemetery an older appearance. These pre-1865 headstones are representative of the more simple funeral customs of the era. Most of the headstones are made of sandstone or marble and range from two to three feet in height. Many have portray forms of nature, such as weeping willows or branches with epitaphs.

The Willey family burial plot is located Oak Grove Cemetery and includes Waitman T. (1811-1900), his wife Elizabeth, and their children Elizabeth, Guy, and Chauncey. It is also in the oldest portion of Oak Grove Cemetery. Other residents of the Chancery Hill neighborhood are also interred there. The Second Empire residence of Alexander Wade (1832-1904), located at 256 Prairie Street, borders the district on its northern boundary. It is a National Historic Landmark. Wade developed the graded school system that was adopted throughout the United States, and, ultimately, in the Monongalia County Schools as well. Wade lived in the neighborhood until his death in 1904, and is interred in the oldest portion of Oak Grove Cemetery.

The John Marshall Hagans family plot is located in the cemetery. The son-in-law of Waitman T. Willey, Hagans studied law under Willey and was elected prosecuting attorney of Monongalia County in 1862, 1863, and 1870. Hagans served as mayor of Morgantown from 1866 to 1869 and, in 1872, was a member of the state constitutional convention. Hagans was elected to the U.S. Congress in 1873 and to the West Virginia House of Delegates in 1879 and 1887. In his later years, Hagans was elected judge of the second West Virginia judicial circuit and was reelected in 1896.

William Wagner (1813-1893), for which Wagner Street is named, is interred in the original portion of
Oak Grove Cemetery. Other notable figures who did not live in the Chancery Hill neighborhood, but were important in the history of Morgantown are also buried in Oak Grove Cemetery. George Sturgiss (1842-1925) another Morgantown lawyer, was responsible for the development of the Sabranton area just to the east of Morgantown and was an important promotor of industry in the area. John James Brown (1825-1905) is interred in a large family plot in the original part of the cemetery overlooking the Monongahela River. The Brown/Gay family plot is an eclectic mixture of Victorian drapery, large granite monuments, and an eight-feet-tall marble angel. Approximately twenty feet to the northeast stands a fifteen-foot-tall granite statue of an angel, symbolic of the late nineteenth century and the changing conception of death. The statue is dedicated to Brown’s daughter, Alexandra Gay Brown. The John Rogers Family (1786-1864), from whom Willey purchased the original land, has a very prominent place in the cemetery in front of the soldier’s monument. John’s heir, George, and his wife Louisa were major landowners in Morgantown and are interred in this plot.

Development and Architecture:

There were a number of changes in Morgantown which encouraged residents to move into the suburbs. The harbinger of change was the establishment of the Seneca Glass Factory in Morgantown in 1896. By 1920, there would be nine other glass plants in the Morgantown vicinity. Railroad connections to Pittsburgh and other outlying areas, in addition to newly tapped natural gas and oil reserves, were also instrumental in attracting many new industries to Morgantown and increasing the growth of industry. The influx of capital precipitated a construction boom as new business owners and university professors erected houses after house in the downtown area. To better govern the growing area the city of Morgantown incorporated and divided the new city into four wards of three separate boroughs in 1901.

In 1903, the city’s first streetcar railway system effectively increased the diffusion of Morgantown residents into these new suburban additions. Chancery Hill was rapidly suburbanized after the South High Street Bridge connected the area conveniently to the downtown. By 1911, the city extended streetcar lines into South Morgantown through the Chancery Hill district on Wagner Road and proceeded south to Dorsey Avenue. Later in the decade, Chancery Hill district saw sustained development.

In 1921, Morgantown was home to more than twelve thousand people, including a total of sixty-nine manufacturing establishments, an increase from forty-nine in 1914. With West Virginia University also growing substantially, the City of Morgantown altered its charter to establish a city manager form of government. The new government took to task the appalling condition of roads and implemented modest city planning. In 1923, the city required that new lots must be platted on additions that connected with the already established streets. This forced real estate developers in the town to make their streets conform to existing thoroughfares. The increasing amount of automobile traffic on these existing insufficient roads prompted the city to initiate city-wide street paving projects to further accommodate the unprecedented urban growth of the city. Wagner Road is one of the few surviving brick streets remaining in Morgantown. The brick paving was produced locally.
Besides the American Foursquare style, the Chancery Hill district also includes examples of other types of American architecture. Continuing in the Craftsman tradition, there are a few examples of two story Bungalows. At 208 Wagner and 345 Dorsey streets, there are examples of the mixing of the Craftsman movement with the desire to maximize living space. The homes are similar, both made of stone with two front dormers and a sloping roof, but 208 Wagner has stone porch supports while 345 Dorsey has wooden porch supports. One can see the increased roof area that made the Bungalow a somewhat costly home to maintain. Another example of the growing American desire for simplification in design is the residence at 213 Wagner. This home is in the Princess Anne style which was a simplification of the more ornate Victorian Queen Anne construction.

Other Colonial Revival period styles represented in the Chancery Hill district include two Dutch Colonials, one at 260 Simpson Street and the other at 201 South High Street. These two homes also demonstrate the different interpretation that homeowners brought to their dwellings. While 260 Simpson Street is constructed of white clapboard and has a triangular pediment doorway, 201 South High Street is part brick and part red clapboard with a simple post and beam front entrance. Both homes have a pergola porch borrowed from the Craftsman movement.

There are several examples of the English Tudor Revival style in the Chancery Hill district. The home at 251 Wagner originally had a tar roof, but still retains its original brown, unscored stucco exterior. Also typical of the Tudor Revival style is the prominent cross gable roof design and the almost non-existent roof overhangs. While the home does not have the half-timbering associated with most Tudor Revivals, the massive chimney and the tall, narrow windows are important Tudor Revival features. Unique to this house and not an expression of Tudor Revival architecture is the Georgian broken-pedimented doorway. Another expression of Tudor Revival architecture can be seen at 240 South High Street, dark brown stucco and brick, and elongated windows. Perhaps an even more interesting expression of English revival architecture can be seen at 229 Wagner. This home, built around 1924, is reminiscent of the English Cottage style with its arched doorways and dark brick wall cladding construction. The relatively small window space and the shallow roof overhang are important Cottage revival features as well.

The early twentieth century atmosphere of Chancery Hill would not be complete without some other eclectic examples. One Victorian Italianate home stands at 231 South High. This home, with its wrought iron latticework around the sloping door frame, flat roof, and projecting cornices and brackets, demonstrates the allure of the Italianate style. The Federal and Georgian Revival styles can also be found in the district. The home at 151 Wagner is a Georgian Revival with its dentils and semicircular pediment and pilasters around the door. The home’s symmetry is another feature of Georgian Revival architecture. Another Georgian Revival at 337 Wagner features a broken pedimented doorway and symmetry. An example of the Neoclassical Revival stands at 260 South High. This cobblestone home has the triangular pediment and the singular windows with shutters commonly found in this revival style.
Summary:

Chancery Hill has a breadth of architecture spanning the development of the Willey farm in 1900 until the 1950s. It is an excellent example of an early twentieth century neighborhood with tree lined streets, and middle income homes. The local industrial development had encouraged middle class citizens to flee the dirt and bustle of the city in search of a more pristine environment. In this regard, Morgantown reflected broad traditional trends in housing changes. Chancery Hill residents, much like their counterparts across the country, built and adapted their homes to their needs and created variations on many traditional architectural styles. The Chancery Hill district is also important because the homes there retain the unique touches that their original owners gave them. The neighborhood is also notable for the long-standing connection to Waitman T. Willey who owned the land and retained a close connection to the area until his death in 1900. His home is now a National Register property within the district. The inclusion of the Oak Grove Cemetery adds to a significant dimension to the district. Many of the early prominent families in Morgantown have plots in the cemetery, and the funerary art is exceptional.

Boundary Description
The boundaries of the Chancery Hill District begins at the northeast corner at the back lots of the east side of Waitman Street and Allison Avenue, and running SW along the back lots to Caddell Street. Then NW to the Alley east of Wagner, and running SW to Barrickman Street; thence west across Dorsey Avenue and along the south line of the older section of the Oak Grove Cemetery following a fence line to University Avenue; thence turning NE along the east side of University Avenue and running along the cemetery to Dorsey Avenue; thence east along Dorsey Avenue and crossing Dorsey connecting with Ford Street; thence NE along Ford Street to Caddell, and following the back property lines for the west side of Caddell, crossing Jefferson Court until meeting an alley; thence turning west along the alley to Riverview Court; thence NE to Simpson; thence east on Simpson to South High Street, and crossing to the east side of South High Street; thence N on S. High Street to encompass lot at 145 S. High and then north along rear lot lines of 128, 116, 112 Wagner Road, and thence S on Wagner to Allison and point of beginning.

Boundary Justification
The area associated with the Chancery Hill District is closely associated with the history of the evolution of Waitman T Willey's farm, as well as the history of the development of Morgantown, West Virginia. The boundaries reflect the area of the neighborhood which has maintained the architectural characteristics for its period of growth.
